The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Kenneth Idol  
873 Battley Dairy Rd

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC's attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC's rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Gloria Murray

=====  
From: Rico Bussey  
Date: 09/14/2014 06:24:34  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's help, and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Rico Bussey

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes

through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

Since the internet became an everyday usable resource to people all over the world, it has grown and expanded in every way. People have been able to use it to express creativity, build businesses, share media, and even connect with people they would have never gotten an opportunity to meet otherwise. The notion that the internet is broken and needs repair is simply not true. The internet is alive, vibrant and growing. Stop trying to govern what doesn't need to be governed.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access

to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: xxxx@xxxx.xxx  
Date: 09/14/2014 06:24:36  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The courts have twice struck down the FCC's attempts to place the Internet under political control. If the FCC attempts this irresponsible action for the third time, Congress should cut off its funding, shut it down, and assign its legitimate responsibilities to other, more responsible agencies. The American people can and will defend ourselves against power-hungry bureaucrats like the IRS and the FCC.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Charles Gamble

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Reducing the Internet to a public utility is known on Wall Street as the "nuclear option," because it would devastate private investment with the force of an atomic bomb. And when private investment dries up, it's only a matter of time before taxpayers will be forced to pick up the tab. Why would we possibly go down that path?

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Date: 09/14/2014 06:24:37  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee's pledge to regulate the Internet lost their elections. That's right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the

American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administrations and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Carl Cinnamon  
429 E Mckinney Ave

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC's sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Paul Dwyer

NAME: Matthew Brown

ADDRESS: 05 Amesbury Place

POST CODE: 3551

COUNTRY: AU

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting

toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: pham anh  
Date: 09/14/2014 06:24:37  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rule making, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear - investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present form.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

pham anh  
215 N Broadway  
Santa Ana, California 92701

Date: 09/14/2014 06:24:38  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by

bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Kenneth Low

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Since the internet became an everyday usable resource to people all over the world, it has grown and expanded in every way. People have been able to use it to express creativity, build businesses, share media, and even connect with people they would have never gotten an opportunity to meet otherwise. The notion that the internet is broken and needs repair is simply not true. The internet is alive, vibrant and growing. Stop trying to govern what doesn't need to be governed.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Marianne Hewitt

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

NAME: Peter Moncrieff

ADDRESS: Greenslade Grove

POST CODE: WS12 1QR

COUNTRY: GB

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning

access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Every infrastructure system in this country other than broadband Internet is decrepit. Water, sewer, power, road and bridges. All in a state of disrepair, dependent on taxpayers, and under the strict control of government regulators. Internet, on the other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don't destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

It doesn't take much to realize that this debate over net neutrality - or worse, turning the Internet into a public utility - is simply another attempt by the federal government to take control of another sector of the economy. Whether for power or tax revenue it doesn't matter, stop trying to fix things that are not broken, and leave the American people and the Internet alone!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama's political agenda, then it is no longer an independent agency, and it is no longer an expert agency. If the FCC has merely become a political extension of Barack Obama's White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC's attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC's rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Sueann Cartwright  
Date: 09/14/2014 06:24:39  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The courts have twice struck down the FCC's attempts to place the Internet under political control. If the FCC attempts this irresponsible action for the third time, Congress should cut off its funding, shut it down, and assign its legitimate responsibilities to other, more responsible agencies. The American people can and will defend ourselves against power-hungry bureaucrats like the IRS and the FCC.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Sueann Cartwright  
3403 S Ferncreek Ave  
Orlando, Florida 32806

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's "help," and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Christa Larsen

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a public utility and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

doris silveira

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

From: xxxx@xxxx.xxx  
Date: 09/14/2014 06:24:40  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job of providing more spectrum for wireless users or deregulating wireline telephone service it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Katie Zanone  
91 11th St  
Cresskill, NJ 07626

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Paul Ondrus

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Amy Wiley

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning

access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: xxxx@xxxx.xxx  
Date: 09/14/2014 06:24:41  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama's political agenda, then it is no longer an "independent agency," and it is no longer an "expert agency." If the FCC has merely become a political extension of Barack Obama's White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Thomas Korjack  
407 01/02 S Osborne Ave

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job of providing more spectrum for wireless users or deregulating wireline telephone service it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC's attempts to regulate the Internet have a well-deserved losing record. Once again the FCC is moving to regulate the Internet to fix a nonexistent problem. The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

From: kevin sparkman

Date: 09/14/2014 06:24:42

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Every infrastructure system in this country other than broadband Internet is decrepit. Water, sewer, power, road and bridges. All in a state of disrepair, dependent on taxpayers, and under the strict control of government regulators. Internet, on the other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don't destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

kevin sparkman

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will

changeâ\200\224and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

ADDRESS: Serbia  
POST CODE: 21000  
COUNTRY: RS  
COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: xxxx@xxxx.xxx  
Date: 09/14/2014 06:24:43  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge

you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Cynthia Brown  
217 Donnie Dr  
Rockport, TX 78382

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a "public utility" and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Ira Schwartz

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking,

a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Travis Dash  
Date: 09/14/2014 06:24:43  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job - providing more spectrum for wireless users or deregulating wireline telephone service - it is trying to move backward in time to 1930s-era phone

regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Travis Dash

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama's political agenda, then it is no longer an "independent agency," and it is no longer an "expert agency." If the FCC has merely become a political extension of Barack Obama's White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will

changeâ\200\224and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Sybille Wells

If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years ã\202-â\200\234 that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

From: xxxx@xxxx.xxx  
Date: 09/14/2014 06:24:45  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Demetrius Corbitt  
911 S Adams Ave  
Freeport, IL 61032

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it

in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard's digital mantra, too: First, do no harm. If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

From: terri Bentley  
Date: 09/14/2014 06:24:46  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee's pledge to regulate the Internet lost their elections. That's right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administration and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an

attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

terri Bentley

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The courts have twice struck down the FCC's attempts to place the Internet under political control. If the FCC attempts this irresponsible action for the third time, Congress should cut off its funding, shut it down, and assign its legitimate responsibilities to other, more responsible agencies. The American people can and will defend ourselves against power-hungry bureaucrats like the IRS and the FCC.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a "public utility" and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: xxxx@xxxx.xxx  
Date: 09/14/2014 06:24:47  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear - investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present url.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
John Backer Sr.  
6753 Westgate Cir  
Talbott, TN 37877

ADDRESS: dublin Ireland

POST CODE: 12

COUNTRY: IE

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our

communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee's pledge to regulate the Internet lost their elections. That's right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administrations and the FCC are entering will end in a

justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Regina Nuss

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

=====  
From: xxxx@xxxx.xxx  
Date: 09/14/2014 06:24:48  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Richard Tash  
1850 Margurite Dr  
Dixon, CA 95620

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is the biggest economic, intellectual, and artistic success story of the century, and it rose up because of free people, not stifling government. The federal government needs to keep its hands off the Internet. It is not broken, and it does not need to be fixed. It is the federal government, not the Internet, that is broken, and in need of fixing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Walter Farrar Jr

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: xxxx@xxxx.xxx  
Date: 09/14/2014 06:24:49  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

If the FCC is taking over the Internet to serve President Obama's political agenda, then it is no longer an "independent agency," and it is no longer an "expert agency." If the FCC has merely become a political extension of Barack Obama's White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Keith Mcguire

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job of providing more spectrum for wireless users or deregulating wireline telephone service it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

ADDRESS: Callosa d'En Sarrià

POST CODE: 03510

COUNTRY: NO

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the

essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Jason Butler  
3782 Cherry Hill Ct  
Northwood, OH 43619

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal

would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: xxxx@xxxx.xxx  
Date: 09/14/2014 06:24:51  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's "help," and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Terrance Troope

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Reducing the Internet to a public utility is known on Wall Street as the nuclear option, because it would devastate private investment with the force of an atomic bomb. And when private investment dries up, it's only a matter of time before taxpayers will be forced to pick up the tab. Why would we possibly go down that path?

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

April Whitehead

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job of providing more spectrum for wireless users or deregulating wireline telephone service it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the

future of internet freedom here in America.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC's attempts to regulate the Internet have a well-deserved losing record. Once again the FCC is moving to regulate the Internet to fix a nonexistent problem. The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Eric Rider

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Chairman Wheeler,

This is the summer of the people. Everywhere across our nation people are standing up to corporate greed. Fast food workers striking for a living wage, and the Market Basket saga in New England are examples. We the people need to be represented in our great nation. Otherwise our democracy will cease to exist. The internet should be regulated for the public good. Not for the benefit of corporations. Please help us keep net neutrality.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Every infrastructure system in this country other than broadband Internet is decrepit. Water, sewer, power, road and bridges. All in a state of disrepair, dependent on taxpayers, and under the strict control of government regulators. Internet, on the other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don't destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Belinda May

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee's pledge to regulate the Internet lost their elections. That's right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administration and the FCC are entering will end in a

justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

=====  
From: Joseph Schmidt  
Date: 09/14/2014 06:24:53  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Joseph Schmidt

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable

will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Michael Fontenot

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a "public utility" and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Ruben Carrillo

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Samuel Pidgeon  
Date: 09/14/2014 06:24:53  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC's sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Samuel Pidgeon

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

From: S. Isbanner  
Date: 09/14/2014 06:25:52  
Subject: Protect Net Neutrality

I was deeply disappointed to hear that the Federal Communications Commission is planning on implementing rule changes that would allow Internet service providers to pay for special, faster lanes to deliver their content. In an environment where large corporations can pay for faster service, start-ups and every day Internet users won't be able to compete and we will lose the open, free-flowing exchange of information that has made the Internet so dynamic and integral to our lives.

The FCC can ensure it has the tools to act by reclassifying broadband as a telecommunications service. I urge you to reject the new rules and to take this vital and common sense step toward protecting net neutrality.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee's pledge to regulate the Internet lost their elections. That's right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administrations and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a "public utility" and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee's pledge to regulate the Internet lost their elections. That's right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administrations and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama's political agenda, then it is no longer an "independent agency," and it is no longer an "expert agency." If the FCC has merely become a political extension of Barack Obama's White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC's attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC's rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's "help," and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Jean Harris  
519 Highland Dr  
Bartlesville, OK 74003

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Reducing the Internet to a public utility is known on Wall Street as the "nuclear option," because it would devastate private investment with the force of an atomic bomb. And when private investment dries up, it's only a matter of time before taxpayers will be forced to pick up the tab. Why would we possibly go down that path?

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear - investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present url.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's help, and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of

unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC's sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a "public utility" and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC's attempt to place regulatory handcuffs on Internet providers - just in case they might do something wrong

someday. The FCC's rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job of providing more spectrum for wireless users or deregulating wireline telephone service it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee's pledge to regulate the Internet lost their elections. That's right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administrations and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC's attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC's rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Merle Clark  
700 N Howard St  
Indianola, IA 50125

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Tom Bagan

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's "help," and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the

Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC's sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

The Internet is not a "public utility" and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

The FCC's attempts to regulate the Internet have a well-deserved losing record. Once again the FCC is moving to regulate the Internet to fix a nonexistent problem. The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear: investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present url.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee's pledge to regulate the Internet lost their elections. That's right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administrations and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free

markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Since the internet became an everyday usable resource to people all over the world, it has grown and expanded in every way. People have been able to use it to express creativity, build businesses, share media, and even connect with people they would have never gotten an opportunity to meet otherwise. The notion that the internet is broken and needs repair is simply not true. The internet is alive, vibrant and growing. Stop trying to govern what doesn't need to be governed.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Joanne Casey  
12525 Callaway Rd  
Callaway, VA 24067

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new

regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC's sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear - investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present url.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's "help," and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a "public utility" and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama's political agenda, then it is no longer an "independent agency," and it is no longer an "expert agency." If the FCC has merely become a political extension of Barack Obama's White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Reducing the Internet to a public utility is known on Wall Street as the "nuclear option," because it would devastate private investment with the force of an atomic bomb. And when private investment dries up, it's only a matter of time before taxpayers will be forced to pick up the tab. Why would we possibly go down that path?

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by

government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Every infrastructure system in this country other than broadband Internet is decrepit. Water, sewer, power, road and bridges. All in a state of disrepair, dependent on

taxpayers, and under the strict control of government regulators. Internet, on the other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don't destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Jesse Knight

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The courts have twice struck down the FCC's attempts to place the Internet under political control. If the FCC attempts this irresponsible action for the third time, Congress should cut off its funding, shut it down, and assign its legitimate responsibilities to other, more responsible agencies. The American people can and will defend ourselves against power-hungry bureaucrats like the IRS and the FCC.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee's pledge to regulate the Internet lost their elections. That's right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administrations and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of

internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Amy Smethurst

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Bonnie Schmidt

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee's pledge to regulate the Internet lost their elections. That's right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administrations and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a "public utility" and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC's sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC's attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC's rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is the biggest economic, intellectual, and artistic success story of the century, and it rose up because of free people, not stifling government. The federal government needs to keep its hands off the Internet. It is not broken, and it does not need to be fixed. It is the federal government, not the Internet, that is broken, and in need of fixing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of

internet freedom here in America.

Sincerely,

Debra Duran

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC's sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The ideological leader of the angry liberals calling for you to reduce the Internet to a public utility is Robert McChesney, the avowed Marxist founder of the socialist group Free Press. In an interview with SocialistProject.ca, McChesney said: "What we want to have in the U.S. and in every society is an Internet that is not private property, but a public utility...At the moment, the battle over network neutrality is not to completely eliminate the telephone and cable companies. We are not at that point yet. But the ultimate goal is to get rid of the media capitalists in the phone and cable companies and to divest them from control." In a country of over 300 million people, even an extremist like McChesney can find, perhaps, millions of followers. But you should know better than to listen to them.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation

that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC's attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC's rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee's pledge to regulate the Internet lost their elections. That's right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administrations and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of

unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Cliff Alapa

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Jim Cooper

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC's sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

The ideological leader of the angry liberals calling for you to reduce the Internet to a public utility is Robert McChesney, the avowed Marxist founder of the socialist group Free Press. In an interview with SocialistProject.ca, McChesney said: "What we want to have in the U.S. and in every society is an Internet that is not private property, but a public utility...At the moment, the battle over network neutrality is not to completely eliminate the telephone and cable companies. We are not at that point yet. But the ultimate goal is to get rid of the media capitalists in the phone and cable companies and to divest them from control." In a country of over 300 million people, even an extremist like McChesney can find, perhaps, millions of followers. But you should know better than to listen to them.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of

unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is the biggest economic, intellectual, and artistic success story of the century, and it rose up because of free people, not stifling government. The federal government needs to keep its hands off the Internet. It is not broken, and it does not need to be fixed. It is the federal government, not the Internet, that is broken, and in need of fixing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee's pledge to regulate the Internet lost their elections. That's right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administrations and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an

attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

changeâ\200\224and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee's pledge to regulate the Internet lost their elections. That's right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administrations and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were

sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Christina Carbajal

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC's attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC's rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Reducing the Internet to a public utility is known on Wall Street as the "nuclear option," because it would devastate private investment with the force of an atomic bomb. And when private investment dries up, it's only a matter of time before taxpayers will be forced to pick up the tab. Why would we possibly go down that path?

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's "help," and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

It doesn't take much to realize that this debate over net neutrality - or worse, turning the Internet into a public utility - is simply another attempt by the federal government to take control of another sector of the economy. Whether for power or tax revenue it doesn't matter, stop trying to fix things that are not broken, and leave the American people and the Internet alone!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Michael Smith

Dear Chairman Wheeler, please donâ\200\231t break the Internet. Donâ\200\231t abandon the â\200\234Hands off the â\200\230Netâ\200\235 approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built todayâ\200\231s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title IIâ\200\231s draconian rules were designed in the 1930s for AT&Tâ\200\231s government-created monopoly. Theyâ\200\231re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We donâ\200\231t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling todayâ\200\231s bipartisan â\200\234Hands off the Netâ\200\235 approach. You canâ\200\231t have â\200\234just enough Title IIâ\200\235 any more than you can be â\200\234slightly pregnant.â\200\235

Title II would hurt startups most: they canâ\200\231t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new

entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard's digital mantra, too: First, do no harm. If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job - providing more spectrum for wireless users or deregulating wireline telephone service - it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a public utility and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government

control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's "help," and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC's sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

Since the internet became an everyday usable resource to people all over the world, it has grown and expanded in every way. People have been able to use it to express creativity, build businesses, share media, and even connect with people they would have never gotten an opportunity to meet otherwise. The notion that the internet is broken and needs repair is simply not true. The internet is alive, vibrant and growing. Stop trying to govern what doesn't need to be governed.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge

you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC's attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC's rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

It doesn't take much to realize that this debate over net neutrality - or worse, turning the Internet into a public utility - is simply another attempt by the federal government to take control of another sector of the economy. Whether for power or tax revenue it doesn't matter, stop trying to fix things that are not broken, and leave the American people and the Internet alone!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama's political agenda, then it is no longer an "independent agency," and it is no longer an "expert agency." If the FCC has merely become a political extension of Barack Obama's White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a public utility and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job - providing more spectrum for wireless users or deregulating wireline telephone service it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Anabel Velez  
65 Switzer Ave  
Springfield, Massachusetts 01109

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a "public utility" and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Carmelita Glenn  
7700 W Airport Blvd Apt 709  
Houston, Texas 77071

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

NAME: Stuart Rose

ADDRESS: Les PelÃ"nes

POST CODE: St Cyprien

COUNTRY: FR

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square.

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless

of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle

free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. From: Thomas Haertel  
Date: 09/14/2014 06:28:53  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Reducing the Internet to a public utility is known on Wall Street as the "nuclear option," because it would devastate private investment with the force of an atomic bomb. And when private investment dries up, it's only a matter of time before taxpayers will be forced to pick up the tab. Why would we possibly go down that path?

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Thomas Haertel

From: kristen Fontaine  
Date: 09/14/2014 06:28:54  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a public utility and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

kristen Fontaine

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

NAME: Ryker Munn

ADDRESS: 771 Lenore Street

POST CODE: N6J4A8

COUNTRY: CA

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Seneca sconiars  
Date: 09/14/2014 06:28:55  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC's attempts to regulate the Internet have a well-deserved losing record. Once again the FCC is moving to regulate the Internet to fix a nonexistent problem. The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Seneca sconiars  
4026 Kirkland Blvd  
Orlando, Florida 32811

Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. =====  
From: Lucia Marquez  
Date: 09/14/2014 06:28:57  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Lucia Marquez  
8253 Primoak Way  
Elk Grove, California 95758

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold

and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

=====  
From: Raymond phillips  
Date: 09/14/2014 06:28:58  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a public utility and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Raymond phillips  
5328 Depot St  
West Valley, New York 14171

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Michelle Cetta  
Date: 09/14/2014 06:29:01  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

It doesn't take much to realize that this debate over net neutrality - or worse, turning the Internet into a public utility - is simply another attempt by the federal government to take control of another sector of the economy. Whether for power or tax revenue it doesn't matter, stop trying to fix things that are not broken, and leave the American people and the Internet alone!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth.

Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Michelle Cetta  
231 Springfield Rd  
Elizabeth, New Jersey 07208

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

From: Renae Woods

Date: 09/14/2014 06:29:02

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Renae Woods

2915 Cougar Ave

Nampa, Idaho 83687

NAME: Geo Craig

ADDRESS: 25 The Paddock

POST CODE: PE28 3JU

COUNTRY: GB

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning

access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

POST CODE: DD1 5DL  
COUNTRY: GB

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become

the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

=====  
From: Natalie Nadeau  
Date: 09/14/2014 06:29:05  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government

to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Natalie Nadeau  
2056 Los Altos Ave  
Clovis, California 93611

ADDRESS: 30 High Street

POST CODE: CF35 6HR

COUNTRY: CH

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband

access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

POST CODE: KY16 9XW

COUNTRY: GB

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting

toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

From: xxxxx@xxxxx.xxx  
 Date: 09/14/2014 06:29:09  
 Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet is the first step in regulating the people who use it. We are a free people, and the FCC needs to leave us alone. If the FCC regulates the Internet after Congress and the courts have told it not to, it will have proven itself to be an unaccountable agency, and the Congress should move to severely limit its powers and budget.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
 Robert Frakes  
 410 W 12th St  
 Portageville, MO 63873

NAME: Charise Richards  
ADDRESS: #02 John Brewers, STT, VI  
POST CODE: 00802  
COUNTRY: VI

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our

communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Herman Wood  
Date: 09/14/2014 06:29:10  
Subject: Save the Open Internet (GN Docket No. 14-28)

Sep 14, 2014

FCC Net Neutrality Comments

Dear Net Neutrality Comments,

The Internet has succeeded because it has always been open: open to companies, no matter how small, with new innovations and open to those speakers with new ideas and viewpoints, no matter how widespread.

Eliminating the principle of net neutrality, which guarantees an open Internet, by granting authority to the powerful cable and telephone companies to establish fast lane service guarantees that the rest of us

who can't afford it will be relegated to second-tier, slow lane service. That action will harm the Internet's roles in driving innovation in the modern economy and promoting small-d democratic ideas.

Please do not allow fast lanes and slow lanes on the Internet.

Sincerely,

Herman Wood

Talent, OR

Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COUNTRY: GR

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: sue pettit  
 Date: 09/14/2014 06:29:12  
 Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rule making, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present form.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

sue pettit  
 W6254 Prairie Rd  
 Conrath, Wisconsin 54731

Subject: Proceeding 14-28 comment from James Mitchell

This is a Proceeding 14-28 comment submitted through battleforthenet.com.

---

NAME: James Mitchell  
ADDRESS: 390 division st. cobourg, ontario  
POST CODE: K9A3R6  
COUNTRY: CA

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules

that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

ADDRESS: Tuckachevskogo Street 32-02 75

POST CODE: 123154

COUNTRY: RU

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

NAME: Mehran

ADDRESS: 09 Legend Court

POST CODE: 3803

COUNTRY: AU

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

=====  
From: sumanth pusapati  
Date: 09/14/2014 06:29:15  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The courts have twice struck down the FCC's attempts to place the Internet under political control. If the FCC attempts this irresponsible action for the third time, Congress should cut off its funding, shut it down, and assign its legitimate responsibilities to other, more responsible agencies. The American people can and will defend ourselves against power-hungry bureaucrats like the IRS and the FCC.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

sumanth pusapati  
4200 Bay St Apt 266  
Fremont, California 94538

=====  
From: Darlene Cedeno  
Date: 09/14/2014 06:29:16  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The ideological leader of the angry liberals calling for you to reduce the Internet to a public utility is Robert McChesney, the avowed Marxist founder of the socialist group Free Press. In an interview with SocialistProject.ca, McChesney said:  
What we want to have in the U.S. and in every society is an Internet that is not private property, but a public utility...At the moment, the battle over network neutrality is not to completely eliminate the telephone and cable companies. We are not at that point yet. But the ultimate goal is to get rid of the media capitalists in the phone and cable companies and to divest them from control. In a country of over 300 million people, even an extremist like McChesney can find, perhaps, millions of followers. But you should know better than to listen to them.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Darlene Cedeno

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: jesse williams  
Date: 09/14/2014 06:29:17  
Subject: Protect Net Neutrality

I was deeply disappointed to hear that the Federal Communications Commission is planning on implementing rule changes that would allow Internet service providers to pay for special, faster lanes to deliver their content. In an environment where large corporations can pay for faster service, start-ups and every day Internet users won't be able to compete and we will lose the open, free-flowing exchange of information

that has made the Internet so dynamic and integral to our lives.

The FCC can ensure it has the tools to act by reclassifying broadband as a telecommunications service. I urge you to reject the new rules and to take this vital and common sense step toward protecting net neutrality.

Subject: Proceeding 14-28 comment from Alex Forman

This is a Proceeding 14-28 comment submitted through battleforthenet.com.

---

NAME: Alex Forman

ADDRESS: 19 Rudgate Lane North

POST CODE: N8H4Y9

COUNTRY: CA

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle

free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

NAME: Victor Suarez

ADDRESS: La Moraleja, Santiago, Dom. Rep.

POST CODE: 51000

COUNTRY: HT

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Melissa Rodriguez  
Date: 09/14/2014 06:29:19  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would

justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Melissa Rodriguez  
885 S Brierwood Ave  
Rialto, California 92376

ADDRESS: Observator, Cluj

POST CODE: 400489

COUNTRY: RO

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Sonia Lupercio  
 Date: 09/14/2014 06:29:20  
 Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Sonia Lupercio  
 506 Deer Run  
 Enid, Oklahoma 73703

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides.

Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Net neutrality is the First Amendment of the Internet, the principle that Internet service providers (ISPs) treat all data equally. As an Internet user, net neutrality is vitally important to me. The FCC should use its Title II authority to protect it.

Most Americans have only one choice for truly high speed Internet: their local cable company. This is a political failure, and it is an embarrassment. America deserves competition and choice.

Without net neutrality, a bad situation gets even worse. These ISPs will now be able to manipulate our Internet experience by speeding up some services and slowing down others. That kills choice, diversity, and quality.

It also causes tremendous economic harm. If ISPs can speed up favored services and slow others, new businesses will no longer be able to rely on a level playing field.

When ISPs can slow your site and destroy your business at will, how can any startup attract investors?

My friends, family, and I use the Internet for conversation and fun, but also for work and business. When you let ISPs mess with our Internet experience, you are attacking our social lives, our entertainment, and our economic well being. We won't stand for it.

ISPs are opposing Title II so that they can destroy the FCC's net neutrality rules in court. This is the same trick they pulled last time. Please, let's not be fooled again. Title II is the strong, legally sound way to enforce net neutrality. Use it.

ADDRESS: 49 Teal Road

POST CODE: DL1 1DF

COUNTRY: GB

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband

access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting

toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. From: James Vollaro  
Date: 09/14/2014 06:29:25  
Subject: Comment re: WC Docket No. 14-28

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality.

In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

From: Michelle Kendall  
Date: 09/14/2014 06:29:25  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's 2010-2011s crippling

new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a public utility and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Michelle Kendall  
1047 Southhampton Dr  
Somerset Center, Michigan 49282

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Bernaldo Cabulizan  
Date: 09/14/2014 06:29:26  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Bernaldo Cabulizan

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

David Jones

The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting

toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

NAME: Sarah

ADDRESS: 214 Lupino St

POST CODE: 6123

COUNTRY: AU

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

NAME: Rena Saad

ADDRESS: Avenue Van Horne

POST CODE: H3S1R1

COUNTRY: CA

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

=====  
From: THUAN LE  
Date: 09/14/2014 06:29:30  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC's attempts to regulate the Internet have a well-deserved losing record. Once again the FCC is moving to regulate the Internet to fix a nonexistent problem. The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

THUAN LE  
303 E 196th St  
Bronx, New York 10458

NAME: MPL  
ADDRESS: Polska  
POST CODE: KANAPKA  
COUNTRY: PL

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become

the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

NAME: Maricela Carranza

ADDRESS: 03 sage court brampton

POST CODE: L6X4J4

COUNTRY: CA

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

=====  
From: Blanche Mondragon  
Date: 09/14/2014 06:29:33  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a public utility and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Blanche Mondragon  
4101 Ramsey St

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

NAME: Andrew Leggett

ADDRESS: 02 Hillcote Close, Sheffield, South Yorkshire, UK

POST CODE: S103PT

COUNTRY: GB

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the

highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal

would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

=====  
From: connie Mendenhall  
Date: 09/14/2014 06:29:37  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet is the first step in regulating the people who use it. We are a free people, and the FCC needs to leave us alone. If the FCC regulates the Internet after Congress and the courts have told it not to, it will have proven itself to be an unaccountable agency, and the Congress should move to severely limit its powers and budget.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

connie Mendenhall  
5316 Stanley Dr Apt 50  
Little Rock, Arkansas 72209

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. ADDRESS: Torten, SÅrby

POST CODE: 52156

COUNTRY: SE

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

ADDRESS: Galway, Ireland  
POST CODE: EIRE  
COUNTRY: IE

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining

moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the

certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Chassare Hambright  
Date: 09/14/2014 06:29:41  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by

bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Chassare Hambright  
3202 Blue Grouse Dr  
Columbia, Missouri 65202
